Web Pages Loading Slowly?

Do you suffer from slow loading web pages? If web pages seem to take forever to load, you may have picked up a virus or spyware in your travels on the internet.

If you want to remove them and keep your computer clean, but you don't know where to start, you're not alone.

To fully protect your computer you should consider LakeNet Internet's Computer Maintenance

Package. LakeNet offers comprehensive computer maintenance at a low price. LakeNet will attempt to detect and remove known viruses, spyware, Trojans and malicious software. After your computer is free of malicious software, programs will be installed to help prevent future infections.

Please call to schedule an appointment and allow 24-48 hours for completion of service.

Note: LakeNet's computer maintenance, malicious software removal & general cleanup is only intended to service internet related issues and does not service or repair after market hardware or software. This service is available to Lakefield customers only.

Open Source = Free Software

"Open-source software is computer software whose source code is available under a copyright license that permits users to study, change, and improve the software, and to redistribute it in modified or unmodified form". Source www.wikipedia.com

For those of us with little to no knowledge of source codes and programming, open-source software is important too. Open-source software gives computer users an alternative to high priced, commercially distributed software.

OpenOffice

OpenOffice is an office productivity suite. It includes key desktop applications, such as a word processor, spreadsheet, presentation manager, and drawing program, with a user interface and feature set similar to other office suites. Sophisticated and flexible, OpenOffice also works transparently with a variety of file formats, including those of Microsoft Office. One of the most resourceful tool found is the ability to export documents into .pdf format. You can download OpenOffice for FREE at www.openoffice.org.

Mozilla

Netscape Communications, the makers of Mozilla believe in two things, first that the Netscape Communicator product should be available free of charge; second that the source code for Communicator should also be free.

Firefox is a FREE web browser and Thunderbird is a FREE standalone email and newsgroup client that can be used as a companion to Mozilla Firefox or by itself. Both products can be found at www.mozilla.org.

Talking Mail with Lakefield's eFeature!!

Want to check your home or business voice mail from your computer?

With Lakefield's enhanced voice mail "eFeature" - it's possible!

The eFeature will send your new voice mail messages, via the Internet, to a designated email address. The eFeature email will state "Lakefield Voicemail" with a subject of "Voicemail Notification".

The email will have an attached wave (.wav) file of the actual voice file of the caller's message. Of course, you will need computer speakers to listen to the message.

Just think, now you can keep a permanent record on your computer of those important voice mail messages. File them in a folder, forward them to a friend, relative or even business associate. Great for travelers who need to check their voice mail messages, they can check them with their laptop, or any computer with internet access, you no longer have to call in to get your voice mail messages!

Here is the best part. If you currently have Lakefield's Voice Mail, the eFeature is already built in and can easily be activated at no additional cost.

Just remember that when you do get home to clear, delete or even further save those voice messages within the voice mail system that connects to your home or business telephone line.

Our Technical Support Department rates this service COOL and CLEVER!

87,000 Feet of New Construction in Two Rivers

We are in the process of completing the third phase of our telephone facilities construction plan for the north side of Two Rivers. Upon completion of this current project, Lakefield will have its facilities available to approximately 80% of all homes and apartment buildings on that side of the city.

This year's project was very ambitious. We placed over 16 miles of telephone cable and passed 430 residential properties. DSL service (high speed Internet access), local and long distance telephone services are now available to virtually anyone within the north side city limits through Lakefield's network.

We want to express a sincere thank you to all those property owners who allowed us to place facilities to their homes. We really appreciate the cooperation and support.

Lakefield "Your Communications Family" extends warm holiday wishes to all of you and your families. Happy Holidays, From all of us at Lakefield We thank you for your continued patronage!

Holiday Feature Special !!!!

Are you tired of your old answering machine ??
Does your old machine...

- Take a message when you are on the phone?
- Have the ability to send email or page you when you have a message?
- Forward a voice message to or from someone?
- Take a message when your power is out?
- Light a Visual Message Waiting light on your phone?
*visual message waiting compatible equipment required

Are you able to check your message remotely?
The answer to all these questions is perhaps - "NO, It Can't"

You need to keep in touch with family, friends and your business associates on a daily basis. Life is just too important to leave in the hands of some antiquated machine!

Try Lakefield's voice mail **FREE** for 3 months. If you are not completely satisfied with the great features of our voice mail and its ease of use - you can go back to the "old ways" of your machine. There is no obligation or charge. That's our Lakefield guarantee.

Recipe Corner

Smokey Chicken Spread

- 3 Cups finely chopped chicken breast, cooked
- 1/2 Cup finely chopped celery
- 1/2 Cup chopped hickory smoked almonds
- 3/4 Cup miracle whip
- 1/4 Cup chopped onion
- 1 Tbs. honey
- 1/2 Tbs. Lawry's seasoning salt
- 1/8 tsp. pepper

Directions

Combine all ingredients, roll into a ball, chill until served.

Serve with assorted crackers.

Add this quick and easy appetizer to your holiday menu.
